CREATING THE PERFECT ENVIRONMENT.

Choosing the right heating and cooling system for your home environment is a big decision. Your AirEase Dealer can help you create the right system for your home comfort needs. To help you make the best and smartest system choice, here are a few things to consider:

EFFICIENCY

It's pretty simple. A high-efficiency system helps lower your monthly utility bills. Efficiency is measured in AFUE (Annual Fuel Utilization Efficiency)—the higher this number, the greater the efficiency. Replacing an older unit with a 90%+ AFUE unit or higher can increase performance and start saving you money.

RELIABILITY

You can always count on your AirEase unit. Our EHX™ Technology and unique burner design work together to deliver premium performance and even heat exchange, which will extend the life of your furnace.

AIR QUALITY

Where you live matters. Your family's sensitivity to a host of natural and man-made allergens means enhanced air quality is all the more critical in your home. Don't forget humidity levels when you're considering the ideal system for year-round comfort.

PEACE OF MIND

More control over your comfort—that's our commitment to you. You can see it in our craftsmanship and technology—like our proprietary Comfort Sync™ controls, which allow you to easily monitor your unit's performance and enjoy maximum comfort in your home.

NOISE REDUCTION

Comfort and performance also include quiet operation of your system. Enjoy quieter start-up and operation with our Quiet Combustion™ Technology.

THE COMBINATION OF A GAS FURNACE AND AN ELECTRIC HEAT PUMP PAIRS TWO ENERGY SOURCES FOR THE PERFECT BALANCE OF ENERGY EFFICIENCY AND COMFORT.

Perfect for keeping warm this winter!
